OUTLINE
TIMELINE

PS C:\Users\prerana\OneDrive\Desktop\assignment 19\CounterThemeApp> npx expo start
Starting Metro Bundler

The following packages should be updated for best compatibility with the installed expo version:
  expo@55.0.25 - expected version: ~55.0.26
  expo-image@55.0.10 - expected version: ~55.0.11
  expo-router@55.0.15 - expected version: ~55.0.16
Your project may not work correctly until you install the expected versions of the packages.

WARN Linking requires a build-time setting 'scheme' in the project's Expo config (app.config.js or app.json) for production apps, if it's left blank, your app may crash. The scheme does not apply to development in the Expo client but you should add it as soon as you start working with Linking to avoid creating a broken build.
